図形の角⑥

答え

名前

◆ア～カの角度は何度ですか。計算で求めましょう。

式

$$360 - (90 + 80 + 70) = 120$$

答え

120°

平行四辺形

式

$$360 - 130 \times 2 = 100$$

$$100 \div 2 = 50$$

答え

50°

式

$$360 - (120 + 70 + 90) = 80$$

$$180 - 80 = 100$$

答え

100°

式 $360 - (110 + 50 + 160) = 40$

$$180 - 40 = 140$$

答え

140°

式

$$360 - 55 \times 2 = 250$$

$$250 \div 2 = 125$$

答え

125°

$$180 - 70 = 110$$

$$360 - (110 + 60 + 110) = 80$$

答え

80°
